

## ADDENDUM # 1

**From:** Lena Butler, Purchasing Supervisor  
**To:** All Bidders  
**Project:** RFP – Laboratory Information System  
**Date:** January 10, 2019

---

**This addendum is related to the County’s Request for Bids “RFB- ACTIVE SHOOTER KITS” and is hereby made a part of said Request for Qualification to the same extent as though it were originally therein.**

---

### Questions Received:

1. I wanted to ask if there were any special details on the OD Green Plate Carriers that are required in this Bid? The Technical Specification does not state much and I would rather ask then assume.  
Carrier: OD Green with Molle Webbing and 3” Velcro Strip for attachment of name label with “SHERIFF” in 2” inch white letters front and back.
2. Is the last awarded price available?

Plate Carrier	\$80
Stand Alone Steel Level III+ Plate	\$91.50
Spall Case Cover	\$48
3. Is this a one-time delivery order?  
This is a One-time delivery order
4. Could you elaborate on the "Spalling Cover"? Are you referring to a Coating on the Plate to reduce Spall or an actual Cover or Sleeve for the plate to be inserted into to reduce spall?  
We are looking at a separate Spalling cover.
5. Is the carrier to be slick with no mollie webbing or with?
6. The side cummerbund, do you want a full cummerbund with Velcro, or single strap with clips?
7. What type of plate carrier is the sheriff office looking to purchase, the law enforcement or military style?

See picture for answer to questions 5, 6, and 7.

8. Can you accept imported goods from China?

We don't have any prohibitions on China imports. We will be looking at the quality of the goods.

The previous answer is being modified. The department has informed me of the following:

They are aware of ITAR export restrictions on vests, but not on import. They would probably shy away because of the following:

1. Department of Justice (DOJ) testing criteria that all mfg. in the US adhere to for testing of ballistic vest.
2. Warranty and repairs problems.

So they would have a problem if the vests have not been tested in the US.
