NEW HANOVER COUNTY ENVIRONMENTAL MANAGEMENT DEPT.

RFB 19-0417 – Outbound Scale Paving and Attendant Booth Installation

ADDENDUM #1
Responses to Bidder Questions
Issued May 8, 2019

1. Will a wooden deck be constructed around the building?
   
   **Answer:** No wooden deck will be installed – the concrete described in the scope is the only decking to be used.

2. Who is installing the building?
   
   **Answer:** The pre-manufactured attendant booth will be delivered to the site by the vendor, and will be installed by the contractor awarded this bid.

3. Where is the material being removed from the site to be taken?
   
   **Answer:** The materials removed by the contractor may be taken to the rear of the landfill for disposal in the appropriate area at no charge to the contractor.

4. Are there any restrictions on time schedule for asphalt installation?
   
   **Answer:** Due to heavy customer traffic during the day, all asphalt work must be performed outside of normal operating hours (landfill hours of operation are 6:30 a.m. – 5:00 p.m. M-F, and 6:30 a.m. – 12:00 noon on Saturdays). Sunday work is permitted. It is imperative that contractors also adhere to the asphalt design specifications to ensure appropriate strength is reached to accommodate heavy trucks using the roadway.

5. Who will provide the IT equipment rack and wiring?
   
   **Answer:** The County is responsible for providing the rack and the wiring. The contractor is required to provide outdoor rated conduit, run between the buildings and terminated at the data closet locations on both sides. The conduit must not have angles any greater than 90 degrees at any point. A pull string must be placed in the conduit and made accessible for County use.

**REMINDER:** The bid deadline is Wednesday, 5/15/19, at 2:00 p.m. Sealed bids must be received by the bid deadline, using the bid form provided in the packet.
