New Hanover County is currently involved in the administration of Hurricane Florence Hazard Mitigation Grant Program (HMGP-Florence) funded by the North Carolina Division of Emergency Management. During the course of the projects, New Hanover County will require services from a North Carolina Licensed Asbestos Inspector. The submitting firm shall provide the local government with asbestos inspection reports required for the demolition of approximately 11 residential structures in New Hanover County, North Carolina.

The approved inspector shall perform a full site inspection for asbestos in accordance with all rules, policies, and procedures of the North Carolina Department of Health and Human Services (NCHHS), produce an asbestos inspection report in conformance with 15A NCAC 19C.0601-0607, and provide it to the designated Project Manager for New Hanover County.

If your firm is interested in providing services to New Hanover County for these programs, please respond by February 17, 2020. New Hanover County requires a letter of interest including your lump-sum inspection fee for each of the units to be inspected, and a fixed price per each processed sample. Since the county will require a quick turnaround for inspections, please also indicate your firm’s average response time for submission of the completed inspections following a notice to proceed.

Please submit your response in writing to the New Hanover County Recovery Coordination Office, Attn: Eliza Baldwin, Strategy Analyst, 1241 Military Cutoff Road, Wilmington, NC 28405. Please also indicate on the envelope “Asbestos Inspection Services Proposal Enclosed.” If you have any questions concerning the scope of work, do not hesitate to contact us at hurricanerecovery@nhcgo.com or (910) 798-7007.
