

ADDENDUM # 1

From: Lena Butler, Purchasing Supervisor
To: All Bidders
Project: RFP-Debris Monitoring Services
Date: August 12, 2020

This addendum is related to the County's Request for Proposals "RFP-Debris Monitoring Services" and is hereby made a part of said Request for Bids to the same extent as though it were originally therein.

1. Is county open to negotiate the terms and conditions at the contract stage with the awarded Proposer/Contractor? **The County is open to negotiate terms and conditions with the successful Proposer/Contractor.** Will the County provide a sample of the agreement for the Proposer/Contractor to review? **Normally, the County provides a draft contract as part of the bidding documents; however, this was not done for this solicitation. Upon award of contract to the successful Proposer/Contractor, the County's Legal Department will prepare the contract that will be sent to the Proposer/Contractor for review. If no changes are necessary, the Proposer/Contractor will sign the document and send back to the County. If changes are necessary, the Proposer/Contractor will note the requested changes and return to the County for consideration.**
2. Would the County be agreeable to negotiating the section concerning Indemnification (RFP Section 1.13)? **As per the County's attorney, the County would not negotiate the vendor indemnity.**
3. Page 2 of the RFP states that this is for a standby contract. Would the County please confirm whether this is correct, and whether or not this contract is for immediate work? **This contract is for immediate work following Hurricane Isaias; however, we would also like for it to remain in place for any future work.**
