

NEW HANOVER COUNTY

ADDENDUM 1

RFQ 21-0412

DESIGN SERVICES for the BLUE CLAY ROAD

BUSINESS PARK INFRASTRUCTURES

These are questions received with the answers in **Red**:

- **Scope of Work – Is permitting (environmental) included in this? Yes. Any and all required permitting is expected to be part of the scope.**
- **The Timmons report shows some options for providing a rail spur. Is that included with this project? The rail spur is not part of the current project.**
- **Do we need to provide an approach in our RFP response? The selection criteria will be the basis of how the committee will score the SOQs, however you are welcome to include additional information. I am attaching a copy of the scoresheet that we will use which may help**
- **Will the selected team need to provide survey services? SUE services? Yes the team will need to provide all required surveying and SUE work needed unless it was done during the Preliminary work already completed.**
- **On Page 19, I only see 80% for selection criteria. What is the other 20% of the selection criteria to get short listed? Sorry about the typo on the selection criteria. Number one should be 60%. See the attached scoresheet for a more detailed breakdown.**
